

## Reduce Your Lead Exposure

Beulah Water Works District & Pine Drive Water District check for lead in the water we deliver on a regular schedule as required by CDPHE. Results of these analyses are available on request.

### **What Can I Do To Reduce Exposure to Lead in Drinking Water?**

Run your water to flush out lead. If it hasn't been used for several hours, run the cold water tap until the temperature is noticeably colder. This flushes lead-containing water from the pipes. To conserve water, remember to catch the flushed tap water for plants or some other household use (e.g. cleaning). Always use cold water for drinking, cooking, and preparing baby formula. Never cook with or drink water from the hot water tap. Never use water from the hot water tap to make formula
